
Test Cases Errors/Suggestions	**I1** When changing/re-configuring the following values, after configuration and prior saving, the system must prompt the user to enter the admin/superadmin's password. This establishes further security. ☑ ~~Updating Personnel Status~~ ☑ ~~Enabling and Disabling User Roles~~ ☑ ~~Database Restore~~ ☑ ~~Account and Security Settings~~
Submission	**Barangay Personnel** ☐ Suffix - added a table in the database, change to dropdown and require(*).p

	User Account Management ☐ Require Admin/Super Admin password when assigning roles (both in the registration and user role tab). ☐ Do not require Role in creating a user account. **Household Management** ☐ Do not require Clan in registration and update forms. ☐ Removed specie_id in pet_census table (retain in UI form, only remove the saving of specie in pet_census table)  ☐ Require the Age field for female and child died (also add asterisks(*) for their details in registration and update forms) **Resident Management** ☐ Place of Birth (barangay, municipality, province) - added a table in db (list of all barangay in PH mapped to municipality and

	province) for address, change to dropdown (but still enable adding function) 

	☐ Removed municipality in education, use the barangay table for place_of_school_barangay_id  **Certificate Generation** ☐ The table was normalized in the database. ☐ Apply pronouns for the certificate (representative). ☐ Check the added FKs, for easier data retrieval/auto-fill (e.g., marital_status and gender of resident/requester).
